MANAGED CLOUD SECURITY

Protect. Govern. Prioritize. Improve.

Managed Cloud Security keeps cloud posture visible, prioritized and connected to remediation actions.

Gain visibility. Reduce risk. Strengthen defense.

Posture Monitoring | Risk Prioritization | Threat Detection | Compliance Tracking | Automated Insights | Actionable Guidance

CUSTOMER PROBLEM

BASIC

Cloud environments generate many recommendations, but teams struggle to prioritize what matters and maintain secure configurations over time.

ADVANCED

Mature cloud environments require continuous posture management, workload protection, exposure analysis and response integration across Azure and hybrid/ multicloud workloads.

HOW WE SOLVE IT

BASIC

- Defender for Cloud monitoring
- Secure Score review
- Regulatory compliance monitoring
- Recommendation prioritization
- Monthly reporting
- Remediation guidance
- Escalation for high-risk findings

ADVANCED

- Defender CSPM operations
- Attack path analysis
- Workload protection monitoring
- Sentinel integration
- Executive reporting
- Architecture reviews
- Automation opportunities
- Remediation governance

YOUR OUTCOME

- Continuous visibility of cloud posture
- Prioritized remediation of critical cloud risks
- Better governance of Defender for Cloud recommendations
- Continuous cloud security improvement

SERVICE MODALITIES

MANAGED CLOUD SECURITY BASIC

INCLUDED

- Defender for Cloud posture monitoring
- Secure Score monitoring
- Critical recommendation review
- Regulatory compliance monitoring
- Monthly reporting
- Remediation guidance
- Risk prioritization
- Escalation of critical findings

KEY OUTCOMES

- Continuous cloud posture visibility
- Prioritized remediation of key risks
- Better governance of cloud recommendations
- Reduced configuration drift and risk

MANAGED CLOUD SECURITY ADVANCED — MOST POPULAR

INCLUDED

- Everything in Basic
- Defender CSPM
- Attack Path Analysis
- Workload Protection Plans
- Cloud alert monitoring
- Sentinel Integration
- Executive reporting
- Automation opportunities
- Architecture reviews
- Remediation governance

KEY OUTCOMES

- Continuous cloud posture and workload protection
- Attack-path prioritization of cloud risks
- Integrated cloud security operations with Sentinel/MXDR
- Improved cyber resilience and risk reduction

SERVICE COMPARISON MATRIX

CLOUD SECURITY OPERATING MODEL

ASSESS — Evaluate posture, configurations and risks

PRIORITIZE — Identify and rank risks based on business impact

REMEDIATE — Guide and track remediation actions

GOVERN — Enforce policies, compliance and best practices

PROTECT — Monitor workloads, alerts and exposures

IMPROVE — Continuously optimize posture and reduce risk over time

WHAT YOU RECEIVE

- Cloud Security Reports
- Secure Score Reviews
- Compliance Dashboards
- Prioritized Recommendations
- Remediation Roadmaps
- Executive Reports
- Attack Path Reviews (Advanced)
- Architecture Reviews (Advanced)
