

SENTINEL ADOPTION READINESS

Adopt Microsoft Sentinel faster with a practical deployment plan, priority connectors and ready-to-operate SOC use cases.

Gain visibility. Reduce risk. Strengthen defense.

CUSTOMER PROBLEM

Organizations planning Sentinel adoption need a clear architecture, cost model, onboarding sequence and detection roadmap to avoid fragmented SIEM deployment.

The result: unclear scope, higher costs, delayed timelines and weaker SOC outcomes.

HOW WE SOLVE IT

INNOVATE defines and supports a Sentinel adoption plan including workspace design, data source prioritization, connector onboarding, detection content, automation, reporting and operational handover.

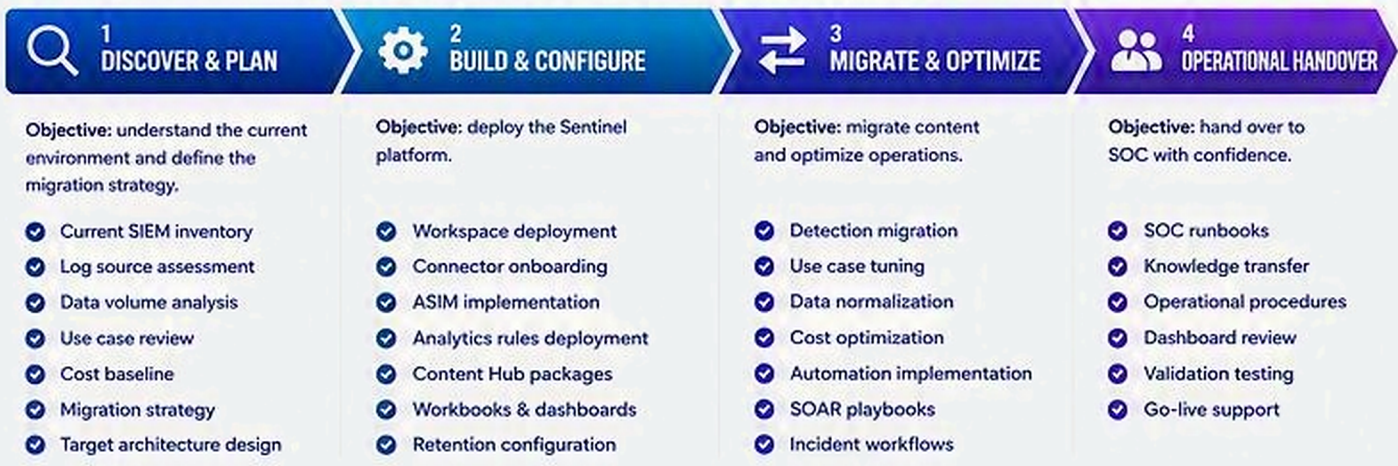

We use Microsoft Sentinel, Defender XDR connectors, Log Analytics, Content Hub, Logic Apps and Microsoft best practices.

- ✓ Faster and safer Sentinel adoption
- ✓ Predictable scope, architecture and cost model
- ✓ SOC-ready use cases from the first deployment wave

YOUR OUTCOME

- Accelerated and confident Sentinel deployment
- Predictable architecture, scope and cost
- SOC-ready detections and operational efficiency
