

SENTINEL MIGRATION | IMPLEMENTATION

Migrate or implement Microsoft Sentinel with a clean architecture, optimized data strategy and SOC-ready detection content.

Gain visibility. Reduce risk. Strengthen defense.

CUSTOMER PROBLEM

Moving from a legacy SIEM or starting a new SIEM program can be risky without a structured migration, data prioritization and use-case roadmap.

The result: data loss, higher costs, security gaps and delayed SOC readiness.

HOW WE SOLVE IT

INNOVATE plans and executes Sentinel migration or implementation, including current SIEM inventory, log source strategy, workspace architecture, connectors, analytics rules, workbooks, automation, retention and SOC runbooks.

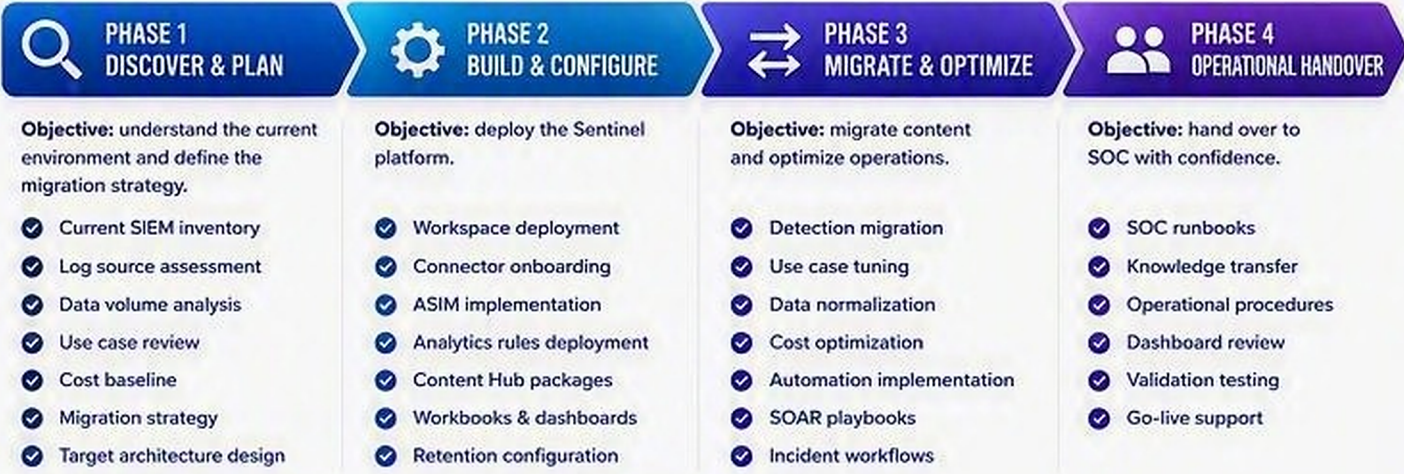

We use Microsoft Sentinel, Log Analytics, Defender integrations, Logic Apps, ASIM and migration best practices.

- ✓ Controlled migration with minimized operational disruption
- ✓ Optimized data ingestion and cost governance
- ✓ Ready-to-operate detection and response use cases

YOUR OUTCOME

- ✓ Faster time to value with a proven migration or implementation approach
- ✓ Optimized architecture and data strategy
- ✓ SOC-ready detections and operational excellence
